

Resolution in support of the United States National Health Insurance Act, H.R. 676

WHEREAS, every person deserves access to affordable quality health care; and

WHEREAS, the number of Americans without health insurance now exceeds 47 million; and

WHEREAS, millions with insurance have coverage so inadequate that a major illness would lead to financial ruin, and medical illness and bills contribute to one-half of all bankruptcies; and

WHEREAS, proposals for “consumer directed health care” such as Health Savings Accounts or Health Reimbursement Accounts (HRAs) would only worsen this situation by penalizing the sick, discouraging prevention and saddling many working families with huge medical bills; and

WHEREAS, managed care and other market-based reforms have failed to contain health care costs, which now threaten the international competitiveness of U.S. manufacturers; and

WHEREAS, administrative waste stemming from our reliance on private insurers consumes one-third of private health spending while the single payer Medicare system has administrative costs of less than 5 percent; and

WHEREAS, U.S. hospitals spend 24.3 percent of their budgets on billing and administration while hospitals under Canada’s single payer system spend only 12.9 percent; and

WHEREAS, Harvard researchers estimate that more than \$300 billion could be recovered by replacing private insurance companies with a single public payer, enough to cover the uninsured and to improve coverage for all those who now have only partial coverage; and

WHEREAS, entrusting care to profit-oriented firms diverts billions of

dollars to outrageous incomes for CEOs and threatens the quality of care; and

WHEREAS, The United States National Health Insurance Act (H.R. 676) would assure universal coverage of all medically necessary services, contain costs by slashing bureaucracy, protect the doctor patient relationship, assure patients a completely free choice of doctors, and allow physicians a free choice of practice settings; and

WHEREAS, most polls show that the majority of Americans support universal health care; and

WHEREAS, as of the date of this resolution, the majority of American physicians (59 percent) believe that Single Payer is the best method of securing universal health care; and

WHEREAS, The United States National Health Insurance Act (H.R. 676) will guarantee every mayor that all residents and employees of his/her city will be fully covered for health care and save millions of taxpayer dollars now spent on premiums to provide less than full health insurance coverage for government employees; and

NOW, THEREFORE,

BE IT RESOLVED, that the Board of Trustees of the Village of Greenwich, New York expresses its support for The United States National Health Insurance Act (H.R. 676), and calls upon federal legislators to work towards its immediate enactment and further urges the adoption of a process to insure that health care providers justify any increase in health care costs.
